

## XCENTRIC, LLC Releases Gray Matter 3.1

**ALPHARETTA, GA, June 11, 2009**— Xcentric, LLC announced the release of Gray Matter 3.1, the newest version of their totally outsourced hosting model that takes all key components of a network offsite into a secure SAS-70 Type II Data Center. This newest version combines improved end user functionality with significant behind-the-scenes technology upgrades for increased security, redundancy and stability.

Some of the improved end user features include a new portal system based on Microsoft's latest SharePoint release, fully managed anti-virus for end users, new universal print driver functionality making printing less of a hassle, a new client service portal and ticket issuing system and a new firm manager which will allow users to self-manage certain preferences.

The behind-the-scenes technology upgrades include complete clustering and redundancy of all core infrastructure, enhanced application delivery with a new Citrix 5.0 platform, and a new virtualization platform allowing for high availability of all core systems.

"Our goal is to continue to roll out enhanced technology that will make our clients' lives easier," explains Trey James, Xcentric's CEO. "We take accounting industry best practices, together with client feedback, and look for ways to improve our services and better serve our clients."

### ABOUT XCENTRIC

Based in Alpharetta, GA, Xcentric provides peace of mind to CPA firms nationwide through highly leveraged network technology solutions. Xcentric's complete network hosting model, Xcentric Gray Matter, allows CPA firms to rid themselves of IT management headaches related to server upgrades, administration, IT staffing, and application updates.
